Object is rounded has grid pattern is smooth, shiny, glinting, reflective, is hollow inside but packed w/parts equipment, ~~has~~ devices + circuits; strong, electronic flavor to it. The idea of "Vantage" is associated w/it. There is motion + great distance - turning, spinning, rotating, going around, as well as something to do with weight + being outside. Shape of Object is rounded w/flat surfaces + substitutions projecting out from it somehow. The idea of "focal," a "central node" is important, as well as communication + transmitting + receiving.

523887 / 688599 - PROJECT "N" - SOURCE 003 - 28 MAY 87

P: "WHERE WOULD YOU LIKE ME TO BEGIN ?"

M: THAT IS GOING TO BE YOUR CALL

? "I FEEL I WOULD GET INTO TROUBLE GOING BACK TO SI"

M: OK - LET'S START A S4 AND IF WE NEED TO WE CAN
MOVE AROUND FROM THERE

? "DID YOU BRING MY LAST SESSION ?"

M: YES - DO YOU WANT TO REVIEW IT?

? "NO BUT I WOULD LIKE P TO HAVE IT ON ~~RECORD~~ OF THE
~~NOTE AS A CUE~~"

M: OK

- 1-66

M:

① P: SEVEN IS AN UNUSUAL CONCEPT - I WOULD LIKE TO
EXAMINE CLOSER WHERE THAT CAME FROM. MAYBE
CUE AGAINST THAT. P: I DON'T KNOW WHERE IT
CAME FROM M: MAYBE YOU COULD CUE AGAINST
THAT - P: OK I'LL TRY -

M:

② P: Paul: You are coming across with a wise disparity
of information - Try to locate the central source of that
information - - P: You mean what ties this all
together M: That's only one aspect - I want you
to draw back in and focus closer on the source
of this wise disparity of data -

③ M: There is one thing that will tie this together
for you and provide you the path needed to complete
this mission. I know what the thing is but I do not
know the nature of the target however once you have
identified the thing it will all make sense to you.

P: Has this all been done

M: No - But I think you are calling the thing by
a different name -

④ P: I'm not getting anything M: Paul, I'll give
you some previous tasking by ~~reducing~~ restating that
you need to draw back in and narrow your focus -
to locate the thing - I'll provide you the thing - and the path you need to move forward to

(2)

P: OIC I'll cue source -

(5) M: You continue to give me a lot of abstract thoughts
but you need to draw down even closer to the source, the
thing - P: Is it an object M: Yes -

(6) M: Stay with your stg I I'm watching and
you doing so - P: - -

(7)
